Assignment Name: Grade Avg

Error Log Entry

What error message did you encounter (if any)? No error and still function

What unexpected behavior did your program exhibit? The code doesnt respond on the user's input

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.) I code > < causing to the computer to not response

Include a screenshot of specific lines of code.

How did you fix the issue? I input ">= <=" instead of "< >"

Provide the corrected code or solution using a screenshot.

```
16:  if (score >= 90 && score <= 100) {
        System.out.println("A");
    } else if (score >= 80 && score <= 89) {
        System.out.println("B");
    } else if (score >= 70 && score <= 79) {
        System.out.println("C");
    } else if (score >= 60 && score <= 69) {
        System.out.println("D");
    } else if (score >= 50 && score <= 59) {
        System.out.println("E");
    } else if (score >= 0 && score <= 49) {
        System.out.println("F");
    }

    input.close();
```

```
12:  if (score > 90 && score < 100) {
        System.out.println("A");
    } else if (score > 80 && score < 89) {
        System.out.println("B");
    } else if (score > 70 && score < 79) {
        System.out.println("C");
    } else if (score > 60 && score < 69) {
        System.out.println("D");
    } else if (score > 50 && score < 59) {
        System.out.println("E");
    } else if (score > 0 && score < 49) {
        System.out.println("F");
    }
```
