

Credit Name: Chapter 4

Assignment Name: Exercise 9 (GuessingGame)

Error Log Entry

What error message did you encounter (if any)? I recieved a message that says "cannot convert from int to boolean"

What unexpected behavior did your program exhibit? I recieved a error that says "Exception in thread "main" java.lang.Error"

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.) I forgot that i didnt double the "==" and instead I only input "=".

Include a screenshot of specific lines of code. 

How did you fix the issue? I input "=="

Provide the corrected code or solution using a screenshot.
